# Cara Menggunakan Buku Ini

Buku saku ini disusun untuk memberikan pengetahuan kepada masyarakat, khususnya pekerja. Isi buku ini mengenai isu kesehatan jiwa dan luka psikologis, cara memberikan pertolongan pertama pada luka psikologis, serta dampak yang mungkin terjadi apabila memberikan pertolongan pertama pada luka psikologis.

Buku ini dapat dibaca secara berurutan agar benar-benar memahami cara memberikan pertolongan pertama pada luka psikologis secara lengkap. Namun buku ini juga dapat dibaca per bagian, sesuai kebutuhan dan tingkat pemahaman pembaca.

Pembaca dapat menerapkan pemahaman dan langkah yang dibahas dalam buku ini kepada diri sendiri maupun orang lain. Untuk memantapkan keterampilan pemberian pertolongan pertama pada luka psikologis, pembaca juga disarankan mengikuti pelatihan bertema serupa.

Selamat membaca!

# Krisis Psikologis

Krisis psikologis adalah reaksi subyektif atas peristiwa yang dinilai sangat menekan atau menimbulkan stres sehingga mempengaruhi kestabilan psikologis individu. Kondisi tersebut kemudian menurunkan kemampuan individu untuk mengatasi masalah dan keberfungsiannya secara umum.

Bard & Ellison dalam Yeager & Roberts, 2015

Suatu peristiwa yang memicu reaksi krisis pada seseorang belum tentu dianggap sumber masalah oleh orang lain

Gejala munculnya krisis psikologis setelah terjadi suatu peristiwa antara lain:

- **Fisiologis**: Jantung berdebar keras, pusing/puyeng, masalah lambung, keringat dingin, pucat, dll
- **Perasaan**: Takut, marah, sedih, cemas, panik, kalut, merasa bersalah, dll

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.
Personal data may be processed to do the following: use precise geolocation data and actively scan device characteristics for identification.
Our third party IAB TCF partners may store and access information on your device such as IP address and device characteristics. # Apa yang Perlu Diperhatikan?

Dalam memberikan bantuan, *First Aider* harus memperhatikan dan mengupayakan hal-hal berikut ini:

**Keamanan *(Safety)***

Semua pihak yang terlibat **aman dan terlindungi** dari ancaman fisik, psikologis, & sosial

Bantuan yang diberikan tidak mengakibatkan lebih banyak kesulitan bagi siapapun

**Kehormatan *(Dignity)***

Semua pihak yang terlibat mendapatkan perlakukan baik sesuai norma sosial, budaya, & agama

# First Aider Dos and Don'ts

| Do | Don't |
|---|---|
| Lebih banyak mendengarkan | Memaksa individu bicara |
| Bertanya dengan sopan dan lembut | Lebih banyak bercerita tentang pengalaman diri |
| Menggunakan kalimat pendek dan sederhana | Menggunakan istilah rumit dalam bicara |
| Bersikap jujur, tenang, sabar, dapat dipercaya | Menunjukkan perilaku tidak menghormati individu |
| Memberi waktu individu mengekspresikan emosinya | Menghakimi individu, meminta bersabar |

# Proses P3LP

**Pertolongan Pertama pada Luka Psikologis** (P3LP) adalah bantuan dan dukungan yang diberikan First Aider kepada orang lain yang sedang mengalami situasi krisis psikologis yang mengakibatkan munculnya kondisi distress (stres negatif).

P3LP merupakan bantuan dan dukungan segera sebagai upaya pencegahan dan atau pengurangan potensi munculnya dampak psikologis negatif agar tidak berlanjut menjadi gejala-gejala masalah psikologis yang lebih berat.

P3LP yang dilakukan di tempat kerja bermanfaat untuk:

- Intervensi dini
- Mengurangi stigma (prasangka negatif pada individu/kelompok tertentu yang dapat menyebabkan diskriminasi atau pengucilan.)

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.
Personal data may be processed to do the following: use precise geolocation data and actively scan device characteristics for identification.
Our third party IAB TCF partners may store and access information on your device such as IP address and device characteristics. Our IAB TCF Partners may process this personal data on the basis of legitimate interest, or with your consent. # Pelaksanaan

3 langkah utama pelaksanaan P3LP:

## Memperhatikan (*Look*)

*First Aider* melakukan observasi untuk mengumpulkan informasi awal terkait situasi dan kondisi individu yang dibantu, terutama identifikasi kebutuhan yang harus segera dipenuhi, serta kemunculan tanda dan gejala luka psikologis atau masalah kesehatan jiwa yang lebih berat.

- Amati situasi dan kondisi yang berlangsung di sekitar individu penerima bantuan.

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.
Personal data may be processed to do the following: use precise geolocation data and actively scan device characteristics for identification.
Our third party IAB TCF partners may store and access information on your device such as IP address and device characteristics. Our IAB TCF Partners may process this personal data on the basis of legitimate interest, or with your consent. ## Mendengarkan (*Listen*)

*First Aider* menerapkan strategi komunikasi terapeutik dalam berinteraksi dengan individu penerima bantuan dalam upaya untuk memahami permasalahan psikologis yang sedang dihadapi terkait peristiwa yang ia alami.

- Jalin kontak dengan individu yang akan dibantu dengan menyebutkan nama dan unit kerja.
- Sampaikan bahwa anda bersedia menemani dan mendengarkan jika individu penerima bantuan membutuhkan.
- Lakukan strategi komunikasi terapeutik.
- Konsentrasi dan pusatkan perhatian kepada individu selama berinteraksi.
- Tampilkan gerakan tubuh yang menunjukkan tanggapan atau pemahaman atas cerita yang disampaikan individu.

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.
Personal data may be processed to do the following: use precise geolocation data and actively scan device characteristics for identification.
Our third party IAB TCF partners may store and access information on your device such as IP address and device characteristics. # Menghubungkan (Link)

*First Aider* membantu individu untuk mengidentifikasi, membentuk, mengembangkan, dan atau memelihara hubungan sosial serta dalam mengakses fasilitas dan layanan yang diperlukan dalam mengatasi permasalahan yang ia alami.

- Bantu individu penerima bantuan memahami proses pencarian jalan keluar dari masalah yang dihadapinya
- Bantu individu penerima bantuan mendapatkan akses layanan yang dibutuhkan, terutama terkait kebutuhan dasar
- Sampaikan informasi yang anda memang ketahui dengan baik secara jelas dan apa adanya. Jika pada saat itu belum punya informasi, sampaikan secara terbuka dan jujur.
- Bantu individu penerima bantuan terhubung dengan orang-orang yang dapat membantu menyelesaikan masalah yang dihadapinya

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.
Personal data may be processed to do the following: use precise geolocation data and actively scan device characteristics for identification.

# Proses P3LP dengan Media

## Lewat Video

- Perhatikan penempatan individu di layar
- Perhatikan tampilan lingkungan individu
- Jika perlu, minta non-aktifkan latar buram, agar dapat membantu periksa lingkungan individu
- Perhatikan perubahan raut muka, nada, tekanan suara, dan tempo bicara
- Dengarkan suara latar dan perubahannya

## Lewat Teks

# Terminasi

Tahap ini merupakan tahap terakhir dalam proses P3LP.

Lakukan penilaian terhadap situasi, kebutuhan orang tersebut, dan kebutuhan kita sendiri. Apabila krisis sudah selesai, dan atau sudah dapat dirujuk, tahap terminasi dapat dilakukan.

Terlepas dari pengalaman kita dengan orang tersebut, kita dapat mengucapkan selamat tinggal dengan cara yang positif dengan

mengucapkan semoga segala hal baik terjadi pada mereka.

# Stres pada Pekerja

Stres merupakan
respon fisiologis & psikologis
yang muncul ketika Pekerja
dihadapkan pada
**TUNTUTAN & TEKANAN**
pekerjaan yang
**TIDAK SEIMBANG** dengan
PENGETAHUAN & KEMAMPUAN
(World Health Organization)

Tuntutan dan tekanan dalam pekerjaan sebenarnya berfungsi sebagai pendorong dan motivasi bagi pekerja untuk meningkatkan pengetahuan dan kemampuannya.

Meskipun begitu, jika stres terjadi dalam waktu panjang

# Gejala Stres

**Respon Fisik:**

- Sering sakit kepala, sakit perut, pusing, badan pegal dan nyeri
- Perubahan nafsu makan atau berat badan
- Sering menggemeretakkan gigi, terutama ketika tidur
- Tidur kurang nyenyak, sering terbangun
- Gangguan buang air kecil dan buang air besar
- Muncul eksim/gatal-gatal pada kulit, jerawatan, sering sariawan
- Menstruasi tidak lancar
- Tekanan darah dan detak jantung tidak stabil
- Gampang sakit karena sistem kekebalan tubuh terganggu

**Respon Emosi:**

- Mudah cemas dan gugup
- Mudah tersinggung atau marah
- Sulit berkonsentrasi, proses pikir melambat
- Kepala terasa “penuh” dengan hal-hal untuk dipikirkan
- Peningkatan konsumsi rokok, alkohol, dan atau NAPZA lainnya

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.

# *Burnout* pada Pekerja

***Burnout* adalah**
**sindrom yang muncul**
**sebagai dampak stres kronis di tempat kerja**
**yang belum berhasil dikelola**
(World Health Organization)

Konsp *burnout* hanya digunakan khusus terkait fenomena di tempat kerja dan tidak boleh diterapkan pada bidang kehidupan lain.

*Burnout* memiliki tiga dimensi:

- Perasaan kehabisan energi atau kelelahan;
- Peningkatan jarak mental dari pekerjaan, perasaan negatif atau sinis terkait pekerjaan
- Penurunan kualitas kerja profesional.

## Gejala Burnout

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.

# Kecemasan pada Pekerja

**Kecemasan adalah respon emosi dan fisik berupa rasa takut, khawatir, dan tegang karena mengantisipasi potensi munculnya bahaya, bencana, atau kemalangan**
(American Psychological Association)

Kecemasan berbeda dengan rasa takut ataupun stres. Rasa takut atau stres melibatkan respons terhadap ancaman nyata dan biasanya berlangsung singkat. Rasa takut atau stres akan mereda dengan sendirinya ketika hal yang mengancam menghilang. Sementara,

kecemasan terkait dengan antisipasi terhadap kemungkinan munculnya masalah dan dapat berlangsung lama. Rasa cemas belum tentu reda meskipun hal yang mengancam sudah tidak ada lagi.

Kecemasan pada pekerja dapat muncul ketika ia mengalami perubahan

# Gejala Kecemasan

**Respon Fisik:**

- Sering merasa mual atau gangguan perut lainnya
- Jantung berdebar-debar tanpa sebab yang jelas
- Otot menegang dan nafas pendek-pendek
- Tubuh gemetaran atau keringat dingin
- Sulit tidur atau kurang istirahat
- Tampak lesu namun gelisah

**Respon Emosi:**

- Takut/khawatir berlebihan terhadap suatu situasi
- Sulit berkonsentrasi, mudah lupa
- Perhatian mudah teralihkan, ketika berbicara sering lompat-lompat topik
- Mengerjakan sesuatu dengan cepat namun tidak beraturan
- Tampak tegang, mudah tersinggung, dan emosi tidak stabil

# Depresi pada Pekerja

**Depresi ditandai dengan perasaan negatif berlebihan (seperti ketidakbahagiaan, ketidakpuasan, sedih, murung, pesimis, putus asa, dan sejenisnya) yang mengganggu kehidupan sehari-hari.**
(American Psychological Association)

Depresi berbeda dengan perubahan suasana hati dan perasaan yang biasa terjadi dalam kehidupan sehari-hari. Setiap orang pernah mengalami rasa sedih, murung, dan suasana hati negatif lainnya. Akan tetapi, ketika perasaan negatif ini sulit diatasi dan muncul hampir setiap saat setidaknya selama **dua minggu**, maka hal tersebut menandakan terjadi depresi. Kondisi depresi menyebabkan bertambahnya stres dan disfungsi serta memperburuk situasi kehidupan orang tersebut.

Depresi diakibatkan oleh interaksi kompleks antara faktor sosial

## Gejala Depresi

**Respon Fisik:**

- Perubahan nafsu makan atau berat badan
- Mudah merasa lelah atau rendah energi
- Sulit tidur dan kurang istirahat
- Sering sakit kepala atau sakit perut

**Respon Emosi:**

- Suasana hati yang buruk (sedih, mudah tersinggung, hampa).
- Kehilangan kesenangan atau minat dalam beraktivitas
- Sulit berkonsentrasi, mudah lupa
- Perasaan bersalah yang berlebihan
- Harga diri rendah, tidak yakin pada kemampuan diri
- Tampak murung, sering termenung, dan mudah menangis
- Keputusasaan tentang masa depan
- Adanya pikiran tentang kematian atau bunuh diri
- Cenderung menjauh dari orang lain

# Pemicu / Pemberat Luka Psikologis Pekerja

Ada beberapa peristiwa atau kejadian yang dapat memicu terjadinya luka psikologis pada pekerja, antara lain perubahan organisasi, tuntutan pencapaian target kerja, persaingan atau konflik antar pekerja, dan perundungan dan kekerasan.

## Perubahan Organisasi

Organisasi tidak selalu sama, namun dapat berubah. Beberapa jenis perubahan organisasi misalnya transformasi digital, perubahan manajemen, restrukturisasi organisasi, *merger*, dan akuisisi.

Kemungkinan luka psikologis akibat perubahan organisasi misalnya:

- Gejala stres akibat penolakan pada perubahan

# Tuntutan Pencapaian Target Kerja

Tuntutan pekerjaan dapat membuat motivasi kerja meningkat apabila disesuaikan dengan kemampuan dan minat pekerja. Namun apabila tuntutan terlalu tinggi atau terlalu rendah, dan terjadi dalam durasi yang panjang, justru dapat merugikan.

Tuntutan pekerjaan yang tidak tepat dapat berupa:

- **Tuntutan fisik**, misalnya bekerja dalam waktu panjang tanpa istirahat cukup, atau tugas mengangkat benda yang berat dalam durasi panjang.
- **Tuntutan mental**, misalnya pekerja junior diberi tuntutan pekerjaan yang kompleks, atau tidak adanya sistem mencegah kesalahan individu seperti perintah kerja yang diteriakkan saja tanpa instruksi tertulis.
- **Tuntutan emosional**, misalnya sering harus berperan sebagai pembawa berita buruk bagi pasien, atau keharusan bersikap ramah

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.

# Konflik Antar Pekerja

Persaingan serta konflik yang terjadi antar pekerja dapat memberikan manfaat, namun dapat juga memunculkan luka psikologis. Manfaat yang muncul misalnya:

- Meningkatkan motivasi
- Muncul inovasi baru
- Meningkatkan kinerja
- Meningkatkan kreativitas dan kemampuan pemecahan masalah,
- Memunculkan jiwa pemimpin
- Menjadikan organisasi berkembang ke arah lebih baik

Kemungkinan luka psikologis:

- Gejala stres seperti meningkatnya jumlah ketidakhadiran dan pengunduran diri pekerja, kemungkinan melakukan ketidakjujuran atau tindak pelanggaran hukum

# Perundungan (*Bullying*)

Perundungan (*bullying*) di tempat kerja adalah penganiayaan terus-menerus yang terjadi di tempat kerja. Siapapun bisa menjadi pelaku intimidasi atau diintimidasi, terlepas dari peran mereka di tempat kerja. Ketika bicara perundungan, kita tidak mempertimbangkan niat pelaku, namun lebih mencermati persepsi dan dampak pada korban.

Ada tiga ciri utama perilaku perundungan di tempat kerja:

- Pekerja menjadi sasaran perilaku / komentar negatif
- Terjadi dalam jangka waktu lama
- Pekerja yang jadi korban merasa tidak bisa menghentikan atau lari dari perundungan

Perundungan di tempat kerja tidak hanya secara fisik, namun juga dapat berbentuk:

- **Ucapan / kata-kata**: komentar meremehkan / sinis, ejekan, memaki, mengkritik secara tak adil, dll.
- **Sosial**: mengintimidasi, mempermalukan seseorang, menyingkirkan

## Efek Samping Menjadi *First Aider*

Ketika kita berada dalam posisi membantu orang lain, sebetulnya kita dapat mengalami beragam dampak positif. Para *First Aider* seringkali melaporkan menjadi lebih bahagia saat bisa membantu orang lain, merasa dirinya memiliki tujuan hidup yang lebih baik, bahkan dapat membangun hubungan lebih positif dengan orang lain.

Namun, seorang *First Aider* sebetulnya juga rentan mengalami luka psikologis. Hal ini karena saat membantu orang lain yang mengalami luka psikologis, *First Aider* menggunakan seluruh kemampuan fisik dan psikologisnya. Misalnya pada saat harus terus mendampingi pekerja yang sedang bermasalah dan terpikir untuk bunuh diri

# Efek Samping yang Dapat Terjadi pada *First Aider*

***Compassion Fatigue***

Perasaan tertekan serta lelah fisik dan mental akibat simpati berlebihan pada individu yang dibantu.

***Caregiver Burnout***

Perasaan kehabisan energi untuk membantu orang lain akibat strategi pemberian bantuan kurang efektif dan atau tujuan membantu kurang realistis.

***Secondary Traumatic Stress***

# Pencegahan dan Pengelolaan Efek Samping

Agar mengurangi efek samping yang dapat dialami oleh First Aider, maka ada beberapa langkah yang bisa dilakukan.

## Rawat Diri (*Self-Care*)

Rawat diri (*self-care*) adalah aktivitas yang dilakukan secara rutin untuk menjaga dan meningkatkan kesehatan dan kesejahteraan diri kita. Bentuknya bisa beragam, mulai dari makan untuk memenuhi kebutuhan nutrisi tubuh, tidur untuk mengisi tangki energi kembali, hingga melakukan hobi yang disukai.

Pada saat sedang berada dalam situasi kehidupan yang penuh tekanan, biasanya rawat diri menjadi hal pertama yang dikorbankan. Padahal, ketika kita tidak cukup melakukan rawat diri, maka kita juga tidak bisa optimal dalam membantu orang lain. Oleh karena itu, *First Aider* juga

## Penanganan Lanjutan

Apabila proses rawat diri dirasa tidak memberikan dampak seperti yang diharapkan dan efek samping yang dialami dirasa menjadi lebih berat, maka *First Aider* dapat mempertimbangkan untuk mencari bantuan profesional. Bantuan tersebut dapat berupa penanganan oleh psikolog klinis ataupun oleh dokter spesialis kesehatan jiwa (psikiater).

Beberapa masalah memerlukan intervensi dari profesional kesehatan mental yang terlatih untuk memberikan dukungan yang tepat dan efektif. Melalui bantuan profesional, *First Aider* dapat:

- menjalani terapi atau perawatan yang sesuai dengan kebutuhan;
- mengembangkan keterampilan baru untuk mengatasi stres atau trauma; dan
- membangun strategi pemulihan yang kuat

# Mekanisme Penerapan P3LP

Tujuan pengelolaan P3LP di tempat kerja ini adalah untuk memastikan agar pegawai yang mengalami luka psikologis ataupun menghadapi situasi krisis dapat memperoleh bantuan yang mereka butuhkan. Selain itu, proses ini juga dilakukan untuk dapat meningkatkan ketahanan pegawai (*resilience*) dan mengurangi dampak krisis bagi pegawai maupun bagi organisasi.

Pengelolaan P3LP ini dapat dilakukan oleh bagian organisasi yang memiliki fungsi dalam manajemen Sumber Daya Manusia (SDM) sebagai penanggung-jawab. Meskipun demikian, pengelola SDM juga dapat melibatkan pegawai lainnya untuk menjadi *agent of change* dalam merumuskan dan mengembangkan program P3LP ini.

Ketika akan mengimplementasikan program P3LP di unit

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.

Di tahap awal implementasi, dukungan dari pimpinan unit kerja memegang peran penting untuk mendorong program P3LP agar dapat berjalan dengan baik dan diterima oleh para pekerja. Salah satu cara untuk mendapatkan dukungan ini antara lain dengan melakukan kajian awal terlebih dahulu. Tujuannya adalah agar data yang diperoleh di lapangan dapat meyakinkan pimpinan unit kerja tentang pentingnya program P3LP yang diusung ini.

Selain itu, penyusunan program P3LP juga perlu disesuaikan dengan budaya organisasi. Setiap organisasi memiliki budaya yang unik, yang dibentuk oleh nilai-nilai, norma, dan kebiasaan yang dianut oleh para anggotanya. Budaya organisasi dapat mempengaruhi cara pegawai dalam merespons krisis dan cara mereka mencari bantuan. Oleh karena itu, program P3LP yang efektif harus dirancang dengan mempertimbangkan budaya organisasi.

Berikut adalah beberapa contoh bagaimana budaya organisasi dapat

# Pencatatan dan Pelaporan P3LP

Tujuan dari pencatatan dan pelaporan adalah agar unit kerja dapat:

- Melacak dan mendokumentasikan insiden krisis di tempat kerja.
- Mengidentifikasi tren maupun pola krisis yang terjadi
- Membantu pihak manajemen untuk menyusun langkah-langkah mitigasi untuk mencegah agar kejadian serupa tidak terulang kembali.

Sistem pencatatan dan pelaporan yang disusun sebaiknya mudah digunakan dan tetap menjaga kerahasiaan isi dari hal-hal yang dilaporkan. Artinya, tim pengelola P3LP perlu memastikan privasi dan kerahasiaan informasi dari pihak-pihak yang terlibat dalam insiden krisis. Selanjutnya, informasi hasil pelaporan dapat menjadi data pendukung untuk mengevaluasi dan meningkatkan program P3LP.

We and our 41 IAB TCF partners store and access information on your device for the following purposes: store and/or access information on a device, advertising and content measurement, audience research, and services development, personalised advertising, and personalised content.

# Penutup

Pentingnya pemahaman terkait isu-isu kesehatan mental di tempat kerja merupakan hal yang tidak dapat dipungkiri. Sebagai anggota komunitas di tempat kerja, kita semua memiliki tanggung jawab untuk dapat menciptakan lingkungan kerja yang aman dan mendukung kesehatan mental individu.

Dalam perjalanan yang telah kita lalui melalui halaman-halaman buku ini, kita telah mengeksplorasi berbagai aspek. Mulai dari krisis psikologis, serba-serbi pertolongan pertama pada luka psikologis, hingga mekanisme pemberian bantuan oleh *First Aider* di tempat kerja. Materi-materi tersebut bertujuan untuk membekali para pembaca dengan pengetahuan dan keterampilan yang dibutuhkan untuk memberikan P3LP di tempat kerja.

Meskipun demikian, kita juga perlu menyadari bahwa pemberian P3LP dapat memberikan efek samping bagi para *First Aider*. Kelelahan, stress, hingga trauma merupakan risiko yang dapat saja dialami oleh orang yang memberikan bantuan. Oleh karena itu,
